EARTHQUAKE

Precision and concentration

Brief activity guide

A strong earthquake, 7.6 on the Richter scale, has shaken the city, and several houses are in ruins. Your task is to find out if there are any casualties in the ruins.

Fly in the drone from several sides. Mark 1 is in mode 1, and the rest is in mode 2. As soon as get a "split time" in the app, you will have lost the drone. Be careful to not fly too high! Set up Marks with a distance apart of 50-100 cm. The closer they are, the more difficult it will be.

Select the **Race** mode in the app
